Acronyms

Abkürzungsverzeichnis

EEPROM electrically erasable programmable read-only memory

LED light-emitting diode

Symbolverzeichnis

Lateinische Zeichen

Symbol	Einheit	Bezeichnung
A	N	Auftrieb
a	m s^{-2}	Beschleunigung
F	N m	Kraft
l	m	Länge
m	kg	Masse
W	N	Widerstand

Griechische Zeichen

Symbol	Einheit	Bezeichnung
	-	elektrischer Widerstand
ϱ	kg m^{-3}	Dichte

Indizes

Symbol	Einheit	Bezeichnung
ax	-	axial
rad	-	radial

1 Test

When I was an **attaché**, I lived in a **cul-de-sac**, but I didn't much care for it as I found there was a fair amount of **élitism** amongst my neighbours. Ein weiteres Beispiel ist hier Gleichung (1.1) Die Erde hat einen Durchmesser von 9.81 m. When I was a student I often left bits of electronic circuitry in my pockets, such as **light-emitting diodes (LEDs)** and **electrically erasable programmable read-only memorys (EEPROMs)**, which often ended up in the washing machine. The **LEDs** didn't fair too badly, but the **EEPROMs** frequently broke. The is commonly used in structural biology, whereas the **elektrischer Widerstand** is used in electronics. **Auftrieb Widerstand elektrischer Widerstand Dichte axial radial**

$$F = m \times a \tag{1.1}$$

Glossar

Glossar

attaché

person with special diplomatic responsibilities

cul-de-sac

passage or street closed at one end

élite

select group or class

élitism

advocacy of dominance by an **élite**
