

1 Chap eins

Hallo!

irgenwelcher Text REM Portability of latexdiff: * REM The standard version of latexdiff requires installation of the Perl package * REM Algorithm::Diff (available from www.cpan.org - * REM <http://search.cpan.org/~nedkonz/Algorithm-Diff-1.15>) * REM but a stand-alone version, latexdiff-so, which has this package inlined, * REM is available, too. latexdiff-fast requires the diff command to be present. * REM Installation under MiKTeX * REM download file "install-tl.zip" it contains perl stuff * REM you may need: * REM - strict.pm * REM copy these files to proper place, e.g.: * REM C:/Programme/MiKTeX 2.8/miktex/lib/site *
